## **SureWare and Ariett Announce Integrated Solution and Collaboration for Travel and Expense Management for Microsoft® Dynamics™ Customers and Travel Agencies**

*Businesses Save Time and Money with Travel Management and Expense Reporting.*

Norwell, MA (March 5, 2009) – Ariett Business Solutions, Inc., a Microsoft Gold Partner and leading ISV developer of web-based expense management solutions for Microsoft® Dynamics™ today announces the availability of MyTripNet™, an automated end to end travel planning, booking and expense solution that seamlessly integrates with Microsoft® Dynamics™. Ariett will leverage SureWare's leading travel industry Profile Tracker and booking workflows, extending the Ariett XpenseNet Management Solution through a marketing collaboration.

Ariett's XpenseNet™ expense reporting solution currently helps Microsoft® Dynamics™ customers manage employee discretionary spending through an easy-to-use web expense reporting tool with real-time integration to the customer's financial management software.

Under the terms of the agreement, MyTripNet will use SureWare's industry profile management portability and GDS connectivity to deliver an end-to-end expense management solution supporting both travel agents and corporate customers using Microsoft® Dynamics™. The Ariett and SureWare collaboration will streamline employee profile management with the booking agency or tool, provide a pre-trip approval process, and expense reporting workflow that fully integrates to Microsoft® Dynamics™. MyTripNet™ will manage pre-trip approvals, trip planning, business T&E policies and provide immediate visibility to travel costs within the financial system.

SureWare's product mix and middleware for the travel industry booking tools will now extend to Microsoft® ERP customers in need of integrated, cost effective solutions for managing employee profiles for travel, expense travel policies and reporting.

"Travel and Expense management complement each other," said Glenn A. Brodie, President of Ariett Business Solutions. "In today's economy, companies are continuously looking for ways to control costs and optimize travel. With SureWare's Travel Profile Manager and Ariett's XpenseNet™ tool for Microsoft® Dynamics™, customers will quickly realize operational savings with pre-trip approval, booking, visibility to travel costs and real-time integration with their financial system. Managers have more control while employees have a better experience. Few products can offer that."

"Traditional expense reporting in paper based or non-integrated systems divert time from valuable company resources," said Brodie. "With Ariett's MyTripNet™ and XpenseNet™, thousands of Microsoft® Dynamics™ customers and their employees will have access to an affordable expense tool that gives them visibility and control so they can stay focused on running their business."

"Companies save time and better control the costs associated with travel when processes are more closely aligned from the trip planning through execution phases" said Rob Erickson, President of SureWare. "Ariett's XpenseNet™ customers will benefit from SureWare's connectivity to all of the leading reservation systems and booking tools in the travel industry. That connectivity simply means more flexibility – allowing Ariett's customers to work with the booking agency or booking tool that is best suited to manage and streamline the unique travel requirements of their company."
